

Senior Response Systems – Beyond the Button

Description

Beyond the Button?

Nearly everyone who has watched television since the 80's knows the infamous commercial line, "Help, I've fallen and I can't get up." However, what most people don't know is why the traditional Personal Emergency Response System (PERS) gadgets don't meet the full needs of most users – giving a false sense of security to those using the systems and the loved ones who care about them. AlwaysConnected Solutions believes in providing thoughtful solutions – more than just a panic button – to reduce risk and maximize independence. Using the latest in wireless and web-based technology, our easy to use solutions can be customized to meet a client's needs – in whatever setting they call home. Our unique web interface allows system updates and alert messages to be managed and distributed across the street, or across the globe – keeping families always connected to those they care about. We have named our product solutions...the **ConnectedCaregiver**. There are three **ConnectedCaregiver** solutions to meet nearly any need. See how affordable and easy it is to be safe and connected.
